

One portal for every school procedure

Requests, approvals, meetings, letters, counseling, university guidance and safeguarding in one place, in Arabic and English, for parents, students and staff.

Arabic and English, right to left

Safeguarding by design

UAE data protection ready

Live in a day

● Parents

- One app for all their children, in Arabic or English.
- Request letters (enrollment, good conduct, fees, transfer) online, follow every step, download the stamped bilingual letter. No office visits.
- Report absences, book parent-teacher meetings, give trip and activity consent.
- See published grades, term report cards, the calendar and exam timetables.
- Follow their child's university plan and the counselor's approval.
- Join with the school's family code. No paperwork.

● Students

- Requests, subject choices and approvals in one place.
- Grades, timetable, exams and calendar.
- Career assessment with matched careers.
- University planning: line-by-line match against requirements taken word for word from official university pages, with links.
- "What if" planning: see how a course or grade changes their options.
- Grade 9 to 12 course plan, sent to the counselor for approval.

● Teachers

- Simple gradebook: type or paste from Excel, publish in one click.
- Refer a student to the counselor in seconds and follow up.
- Raise a safeguarding concern safely, straight to the safeguarding lead.
- Approve requests, take parent meetings, see cover arrangements.

● Counselors and career advisors

- Every referral and case in one place: notes, version history, meetings and tasks.
- AI-assisted action plans, always reviewed and approved by a person.
- Approve course plans with notes; Grade 12 application board with deadlines and checklists.
- Alerts when a university changes its entry requirements, and which students are affected.

● Safeguarding

- Sensitive cases visible only to permitted staff, never in search or dashboards.
- Every view recorded in the audit log.
- Parents never notified automatically: telling a family is a recorded staff decision with a reason.
- Sensitive information is never sent to AI.

● Leadership

- Dashboards: requests, response times, slowest services, workload by team.
- Ask questions in plain language, such as "Which service is slowest?"
- AI meeting briefs, always marked as drafts.
- Full audit trail and a compliance page aligned with UAE data protection law.

● School office, administration and getting started

- 29 ready-made services with forms and approval routes, editable without IT help.
- Letters carry the school's own logo, name and seal, in both languages.
- Import staff, students, guardians and classes from Excel or CSV, checked before saving, never duplicated.
- Roles and access managed by the principal in plain language.
- Sign in with email, Google or Microsoft.
- Live in a day: sign-up, setup wizard (logo, colours, terms, holidays), then import.
- One-term pilot with five launch services and success measures agreed up front.
- Very light maintenance: the school runs it, and the platform is checked automatically every day.
