

One portal for every school procedure

Requests, approvals, meetings, letters, counseling, university guidance and safeguarding in one place, in Arabic and English, for parents, students and staff.

Arabic and English, right to left

Safeguarding by design

UAE data protection ready

Live in a day

• Parents

- One app for all their children, in Arabic or English. Installs on the phone home screen, with alerts. No app store.
- Request letters online, follow every step, download the stamped bilingual letter. No office visits.
- Report absences, book meetings, give trip consent; see grades, report cards and the calendar.
- WhatsApp updates if they opt in. Sensitive matters never appear in the message.
- Pay fees through the school's own payment link, one tap from home.
- Download their child's career report (PDF) and follow the university plan.

• Students

- Requests, subject choices, grades, timetable and exams in one place.
- Career assessment with matched careers and a downloadable career report.
- University planning across 116 universities in 15 countries, including the UAE and Saudi Arabia. Entry requirements quoted word for word from official pages for 111 of them.
- "What if" planning and a Grade 9 to 12 course plan approved by the counselor.
- Register for university fairs, visits and info sessions; open partner resources.
- Free career taster for any student, no sign-in needed.

• Teachers

- Simple gradebook: type or paste from a spreadsheet, publish in one click.
- Refer a student to the counselor in seconds, or raise a safeguarding concern straight to the safeguarding lead.
- Approve requests, take parent meetings, see cover arrangements.

• Counselors and career advisors

- Every referral and case in one place: notes, versions, meetings, tasks.
- AI-assisted action plans, always reviewed and approved by a person.
- Grade 12 application board; alerts when a university changes its requirements.
- Run university fairs and visits: registrations, reminders, attendance.

• Safeguarding

- Sensitive cases visible only to permitted staff, never in search, dashboards or group figures. Every view audited.
- Parents never notified automatically: telling a family is a recorded staff decision with a reason.
- Sensitive information is not sent to AI unless the school turns it on.

• Leadership

- Dashboards and plain-language questions, such as "Which service is slowest?"
- Inspection evidence pack for any period: bilingual PDF on the school letterhead, no case details.
- Pilot measures: staff active, parent adoption, days to issue a letter, requests on time.
- School groups: one dashboard comparing schools, and templates shared across them.

• School office, administration and getting started

- 29 ready-made services with forms and approval routes, editable without IT help.
- Letters carry the school's own logo, name and seal, in both languages.
- Import staff, students, guardians and classes from spreadsheets, checked before saving, never duplicated.
- Connect the student information system: scheduled sync, or the Horizon API with scoped school keys.
- Personal data export and erasure for one person, and a full school data export at any time (UAE PDPL ready).
- Roles and access in plain language. Sign in with email or the school's work accounts.
- Live in a day: sign-up, setup wizard, import. One-term pilot with success measures agreed up front.
- Checked automatically every day, with a public status page.
